Source: Prenatal care data from KDHE; all others from County Health Ranking Robert Wood Johnson Foundation

Adults in poor or fair health

Poor physical health days

Poor mental health days

Preventable hospital stays

per 1,000 Medicare enrollees

Adults who smoke

Adults who are obese

Auto crash deaths

per 100,000

Sexually Transmitted Infections rate

Births to teen mothers

per 1,000

Low birth-weight babies

Inadequate prenatal care

per 100 births

KEY COUNTY CONCERNS:

A declining rural population and low numbers of providers per capita make access to health care more difficult.

Allen County's high percentage of older adults may strain the health care system.

The county, like the nation, continues to see rising obesity rates.

More than one-third of Allen County residents live below 200 percent of federal poverty level.

Births to teen mothers are higher than the national average, and the percentage of mothers with inadequate prenatal care is rising.
