Auto crash deaths

per 100,000

Sexually Transmitted Infections rate

Births to teen mothers

per 1,000

Low birth-weight babies

Inadequate prenatal care

per 100 births

KEY COUNTY CONCERNS:

Rising obesity rates and a projected increase in the older population will likely strain the health care system.

The county has a very high poverty rate, with over half of the residents at or below 200 percent of the Federal Poverty Level.

The percent of Wyandotte County residents who have not seen a doctor in the past year due to cost is almost double the state average.

County residents have fewer health care providers per capita than are available in more affluent counties.
